Documented weighing of small components

Often table or floor scales are used for weighing for the manual preparation of manual additions to a mixing processes. The ManDos manual weighing system is used to guarantee the required batch documentation and reproducibility, even with manual processes in the small and ultra-small volume metering sector.

ManDos is a modular system combining the necessary elements, such as table or floor scales, surge bins, desks, suction

systems, barcode readers or label printers and the software solution needed for this.

The software is based on a database that is used to store recipes and production results.

The required components from the modular system can be combined to create an overall solution that meets the specification precisely, offering either individual work stations or combined multiple work stations. ManDos can also be connected via interfaces

to existing control systems or to an ERP system, like SAP. With ManDos, the user can avoid errors in production, thanks to recipe-supported user guidance and at the same time document production and perform batch traceability. Losses or incorrect batches can thus be reduced. The flexible modular system enables companies to create an integrated total solution incorporated in the production landscape step by step.

The solution

Applications

ManDos Industrie is a version specifically developed for the food and pharmaceutical industries and takes into account the specific requirements of standards and regulations governing these sectors, such as IFS and GMP.

The housing and assemblies are manufactured throughout in stainless steel, as great importance is attached to ease of cleaning. Systems can be provided with or without weighing tables and with a number of diffe-

rent fixing options, such as floor mounting on legs, wall mounting or even ceiling mounting, thanks to its modular design.

Do you weigh accurate to the gram?
ManDos - for small quantities **AZO.**

Do you weigh operator-guided
ManDos - for small quantities **AZO.**

Do you weigh documented?
ManDos - for small quantities **AZO.**

Do you weigh mobile?
